EXPERIENCE

Pixeltree   March 2021 - Present
Junior Software Developer
- Built and maintained scalable web applications for a variety of clients on the front and backend
- Independently worked as the sole developer for a financial client, from working on epic tickets to managing project timelines
- Analyzed and improve CI/CD issues to increase build speeds by 30%
- Assisted in developer onboarding and mentoring
- Used Agile processes in my work and enacted DevOps practices to ensure resilient, quality systems
- Worked with Ruby on Rails, CircleCI, PostgreSQL and Heroku

Lighthouse Labs   August 2021 - Present
Web Development Mentor
- Mentored aspiring developers attending the Lighthouse Labs bootcamp in learning programming languages and building projects
- Worked with mentors and staff to create productive and engaging environments for learning

Philips   May 2019 - Sep 2019
Financial Analyst Intern   Toronto, ON
- Worked under the Business Financial Controller in performing profitability analyses, trade spend management, and supervised outsourced AP functions

PROJECTS

Fetch
Developed a location-based friend finding app which leverages Google Maps API for location services. Built with React and Ruby on Rails.

Scheduler
Implemented a single-page interview scheduler application built with React and express.

Quiz App
Created a quiz-app using JQuery and express allowing users to make and take quizzes.

Tweeter
Implemented a Twitter application with a Node.js/Express backend and powered by AJAX.
